Cup Holder

Electronically Height Adjustable Table Top (Arch cut-out for ease of accessibility)

Adjustable Dictation & Microphone Holder

Foot Rest

CPU & UPS Platform

4" Heavy Duty Wheels

AFC Industries Introduces First All-Inclusive Radiology Workstation

New Ergonomic Cart Boosts Productivity, Reduces Stress

AFC Industries, Inc. (College Point, NY), a leading manufacturer of high-quality ergonomic medical and technical furniture, introduces ErgoTier, a sophisticated new addition to its MaxFlex series of customizable workstations for radiology reading.

A next-generation single tier cart, Ergo Tier takes AFC's thoughtful ergonomic design to a new level. It combines a strong, durable, height-adjustable single tier workstation with a new flexible flat panel monitor platform. At the touch of a button, the height of the work surface and displays can adjust to the desired level. The monitor's forward, backward and tilt positions can also be modified to meet the user's exact needs. Whether seated or standing, users will enjoy a comfortable and ergonomically enhanced work environment.

The cart comes with a full range of accessories to ensure the ultimate in reading comfort and convenience. Cable management keeps wires neat and unobtrusive, while dimmer-controlled task lighting illuminates the user's work to the desired intensity, reducing eye strain and monitor glare. Adjustable phone and dictation equipment supports keep this equipment within easy reach, while leaving work surfaces clutter-free.

Other useful features include a CPU/UPS platform, sturdy footrest to ease back strain and even a stable cup holder positioned to avoid spills. Heavy-duty locking castors facilitate easy movement.

"We were approached by a well-known radiologist to design the ultimate all-inclusive, user-friendly, ergonomically sound medical imaging workstation," said Amir Rotlevi, CEO of AFC Industries, Inc. "The radiologist wanted to increase his department's productivity while minimizing the physical stress of digital reading. Our designers and engineers developed the Ergo Tier, which fulfills these requirements and more. We're now looking into fine-tuning the Ergo Tier for use in other fields."

AFC manufactures a range of ergonomically designed single-tier carts-rectangular, corner, and bean-shaped-dual-tier carts, telescopic carts and workstations. All are available with a full range of shelves, keyboard trays, storage compartments and other accessories. All items are made with superior laminates in a broad range of colors and are available in the configuration of the user's choice.

ABOUT AFC INDUSTRIES, INC.

For over 10 years, AFC Industries has been an innovator in the field of medical and technical furniture. From ergonomic, high-quality workstations, carts and racks to complete modular storage systems, the company's product line is crafted for the ultimate in safety, adaptability, comfort and function. All products are constructed of the highest quality reinforced steel and may be customized to meet a full range of needs. Noted for its high level of customer service, AFC offers complementary room design analysis and 3-dimensional designs, furniture customization and ongoing customer support.

The company supplies furniture to leading medical OEMs as well as a full range of medical facilities, from major hospitals to freestanding clinics. AFC Industries, Inc. is located at 13-16 133 Place, College Point, NY, 800-663-3412. Visit them on the Web at www.afcindustries.com
