NO more downtime!
Just 24/7 runtime...

Now available on all our PC (Point-of-Care), Laptop, Tablet, and Pole carts, our new **Hot Swappable Power Supply** provides uninterrupted power to your workstation wherever, and whenever you need it. Simply swap out the drained out battery from the cart for a fully recharged battery in no time from the recharging station for continuous workflow.

It doesn't get any easier!

ACCESSORIES

## Interactive workstations. Flexible. Adjustable. Adapt to you!

Sit. Stand. Raise monitors. Lower monitors. Move them in. Move them out. These are the building blocks of an ergonomic workstation.

Different users. Different needs.

AFC workstations. Electronically height-adjustable at the touch of a button. Independent adjustment of monitor height and focal length for optimal viewing. Digital readouts to preserve and easily return to your ideal settings for surface and monitor placement. Available with surface tilt. A host of valuable features— ambient LED backlighting to ease eye strain and improve reading quality; a variety of monitor platforms; mounting solutions for the growing interest in large monitors; acoustical privacy partition to improve concentration; pop-up data port and built-in USB hub to facilitate neat and tidy use of ancillary equipment. And more.

Our flexible workstations and carts come in a wide variety of sizes, shapes, multi-tiered designs, and color options that accommodate virtually any location and workplace need. They can be enhanced with cabinetry, shelving, computer storage, and retractable features.

AFC workstations. Helping you perform better.

The Whitestone™

The Whitestone™ workstation is AFC's radiology dream station, loaded with valuable new enhancements as well as a full array of electronics, lighting, power and cable management that facilitate performance, comfort, and ease of use. An environmental heating and cooling system controlled at the workstation allows for direct regulation of temperature and alleviates heat generated by computer equipment.

A new monitor bracket supports large monitors weighing up to 50 lbs, responding to a growing interest in larger images. Digital readouts for all workstation settings— surface and monitor height and monitor focal length — enable every user to preserve and easily restore optimal settings. We have added acoustical properties to our wrap-around privacy partition to reduce extraneous sounds and create a more quiet environment for concentration.

Topping off this premium workstation, we have introduced the handsome Swietenia (*Swee-TEEN-ee-uh*) laminate, to enhance the aesthetics of your work environment.

Complete electronic adjustment capabilities are the foundation of this highly adaptable workstation—for surface height in sit-stand positions, surface tilt, and both vertical and horizontal adjustment of monitors. Ambient LED backlighting with dimmer control alleviates eye strain and improves the readability of images. A pop-up data port and USB unit is built into the work surface for convenient and tidy connection of almost any ancillary digital or electronic device. Multi-channel cable management keeps wires neat and unobtrusive and allows for important separation of power and electric wiring.

The Whitestone™— delivering superior comfort and adaptability to the requirements of different users and the demands of the evolving digital world.

5

LED task light

Electronically height adjustable and retractable monitor platform on telescopic drives for 3/4/5 LCD monitors

Ambient LED backlighting with dimmer switch

Acoustical partition that reduces noise

Pop-up data and power ports

Adjustable phone arm

Keypad to electronically adjust monitor height and focal length

Advanced warm/cool air environmental control system

Cable management

Keypad to electronically adjust work surface height and tilt

Electronic Adjustment:

- **SURFACE HEIGHT**
- **SURFACE TILT**
- **MONITOR HEIGHT**
- **FOCAL LENGTH**

6

Features and Benefits

- Electronic adjustment of work surface height and tilt
- Independent electronic adjustment of monitor height and focal length (forward/backward motion)
- Monitor bracket # AFC2530 supporting up to 50 lbs
- Digital readout of surface height
- Digital readout of monitor height and focal length, with memory settings
- Pop-up data ports and a built-in USB hub embedded in the work surface (see photo on page 7)
- Ambient LED backlighting with dimmer switch (see photo on page 7)
- Acoustical partition that reduces noise
- Advanced warm/cool air environmental control system regulated at the workstation (optional)
- Cold-rolled 11-gauge steel frame with epoxy-powder-coated finish
- Particle-board-core top with high-pressure laminate finish edged with bumper molding
- Split bottom shelves
- Wire manager
- Power strip
- Four-inch casters (two of them locking)

Specifications

- Work surface width: 84"
- Work surface depth: 34"
- Height from the floor:
    - Work surface: 28" to 47"
    - Monitors: 38" to 57"

LCD Monitor Arms on telescopic drives with electronic adjustment of monitors' height and focal length
Acoustical partition reduces extraneous sounds and create a more quiet environment for concentration

Adjustable LED backlight with dimmer control alleviates eye strain & improves readability of images

Dimmer switch for LED backlight

Pop-up units include Ethernet network and parallel ports as well as standard AC power outlets and can be customized to a site's particular needs.

Separate **USB units** include four ports, so you can easily connect and use almost any digital device while remaining seated

Environmental heating and cooling system controlled at the workstation

Three way rotary switch of our **LED Task Light # TAL400** enables user to toggle between white light and red light output

Power strip with 8 plugs and turn on/off switch

Deluxe Ergo Tier Cart™

We're pleased to raise the ergonomic standards bar and to offer radiologists well-designed, durable furniture that reduces the risk of strain and injury, while helping them maximize performance in their mission-critical healthcare role. The **Deluxe Ergo Tier Cart™** is designed to meet the need for easy electronic adjustment, at the touch of a button, of the work surface height and independent monitor positioning for height and focal length, as well as work surface tilt within a 15° range of motion. Both seated and standing work positions are accommodated, and a digital readout for surface height is standard with the **Deluxe Ergo Tier™**.

Enhancing features for lighting, privacy, computer storage, ancillary equipment, and more are offered on an optional basis. They include an attached wraparound privacy partition suited for rooms occupied by more than one person; full or split bottom shelves, ambient LED backlighting with dimmer switch, pop-up data ports and a built in USB hub recessed in the work surface; and built-in fans or an advanced environmental control system for warm and cool air.

See *Optional Features and Benefits* on the next page for a more complete list of options.

Ergo Tier Cart™

The **Ergo Tier Cart™** includes numerous features that empower radiologists and healthcare professionals to optimize their reading environment. The workstation has independent, electronic height adjustment of the work surface and monitor platform. The monitors can be retracted toward and away from the user, either manually or electronically.

The **Ergo Tier Cart™** is available with a full range of accessories to ensure comfort and convenience. Cable management keeps wires neat and unobtrusive, while dimmer-controlled task lighting illuminates the work surface at the desired intensity, reducing eye strain and glare. Adjustable phone and dictation arms keep the equipment within reach, while leaving work surfaces clutter-free.

Other useful features include CPU/UPS holders, a sturdy footrest to ease back strain, and even a metal cup holder positioned to avoid spills. Four-inch locking casters facilitate easy movement.

Dual Tier Cart™

Dual Tier Cart™ 90"W x 38"D
(modesty panel and accessories are optional)

16

The Dual Tier Cart™ is ideal for professionals who require two independently adjustable surfaces to perform their tasks. At the touch of a button, the **Dual Tier™** lets you adjust the height of the monitors and work surfaces from a seated to a standing position.

In its bifocal position, the monitors are lower than the work surface, ensuring a comfortable viewing angle. This flexibility delivers optimum body positioning and comfort.

Why adjust yourself to your workstation when the **Dual Tier Cart™** adjusts to you?

Both tiers at same height

Bifocal position (lower back tier)

Features and Benefits

- Independent electronic height adjustment of both tiers
- Customized ergonomic work surfaces available

The Duet Tier™

The **Duet Tier™** for those who need to move from one working position to another. This workstation allows users to sit at one work surface while having the second work surface within reach at a comfortable height. This is ideal for someone who has to scan several pages, or someone working with a microscope in a standing position and sitting at computer without having to adjust the height of entire work surface.

With two electronic surface height controls the **Duet Tier™** is suitable for multiple users, at different heights, working on the same task. Dual presentations become easily manageable, with two heights available in one workstation.

Optimizing your mobile computing needs

Today's advancing technological world demands what we at AFC refer to as "Whenever ⇔ Wherever" access to data, including electronic medical records, radiology images, and more. The need has become ubiquitous, throughout all areas of healthcare facilities and professional functions — from radiology reading rooms to patient bedsides, operating rooms, conference rooms, and more; in oncology, cardiology, nuclear medicine, labor and delivery, and more.

AFC's array of durable mobile carts are designed to meet this growing need, while incorporating ergonomic features that make them adaptable to any user. Security features protect both sensitive patient information and computer equipment. Our carts are built from materials for thorough disinfection. They are available in footprints as small as 19" for easy maneuvering in tight places. Long-lasting batteries can be loaded so that carts can move from area to area without being connected to electrical outlets.
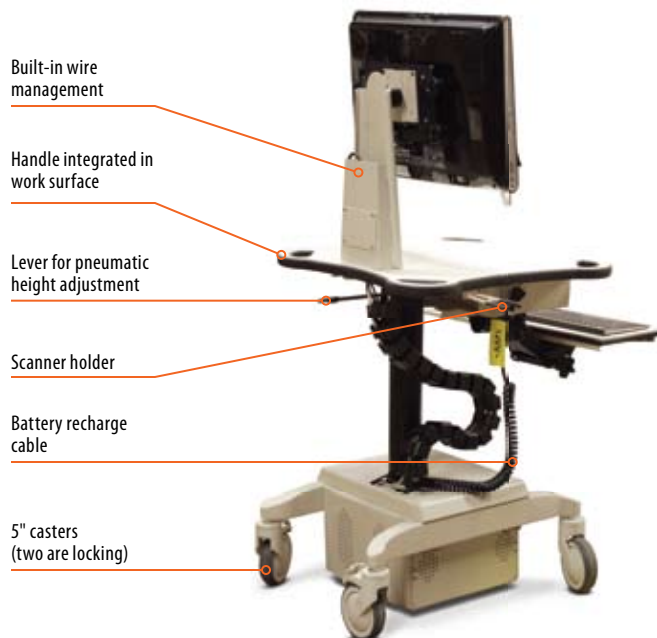

Now available on all PC (Point-of-Care), Laptop, Tablet, and Pole carts, our new **Hot Swappable Power Supply** provides uninterrupted power to your workstation wherever, and whenever you need it.

Whatever your need is, AFC can build a mobile cart solution for you.

PC Cart™

LED battery status display

Phenolic work surface

Utility drawer with electronic lock

Retractable keyboard tray and mouse tray

Wire manager

Pneumatically height-adjustable telescopic drive

Power supply unit (optional battery)

PC Cart™ 910 (front view)

Built-in wire management

Handle integrated in work surface

Lever for pneumatic height adjustment

Scanner holder

Battery recharge cable

5" casters (two are locking)

PC Cart™ 910 (back view)

The **PC Cart™ 910** combines a streamlined look and enhanced functionality with the hallmark durability and ergonomic design of AFC's mobile work stations.

With an all-in-one computer, the height-adjustable **PC 910** offers a battery that can run for up to 25 hours before recharging. UL 60601-1 compliant, it is safe to use throughout facilities. Fleet management software allows for IT monitoring, management, and programming of carts for location, battery status, and scheduling of computer shutdown, recharging and maintenance.

A phenolic work surface with rounded corners enhances safety and appeal. Cutout handles on all corners facilitate grip, access from any user position, and range of motion. The retractable phenolic keyboard tray features ergonomic tilt, swivel, and a sliding mouse tray for both left- and right-handed users.

Features and Benefits

- Sit-to-stand height adjustment (pneumatic or electronic)
- Thorough disinfection for clean room use
- Supports all-in-one computer as well as separate thin client and monitor
- Mounting for all-in-one computer or standard monitor VESA (75/100)
- Rounded phenolic (optional plastic) work surface for greater safety, comfort, and appeal
- Seamless integration of handles into the work surface on all four corners for easy grip from any user position
- Keyless electronic lock for utility drawer and divider to facilitate administration of care in two-patient rooms
- Phenolic retractable keyboard tray with ergonomic negative and positive tilt and swivel
- Mouse tray slides to accommodate left- and right-handed users
- 5" casters with round tread wheels for ease of movement

Specifications

- Footprint size: 20"W x 24"D
- Work surface size: 24"W x 24"D
- Keyboard tray size: 19"W x 8"D
- Height of work surface from the floor: ~30" to 42"

POWER SUPPLY OPTIONS

Hot Swappable Mobile Power Systems

Hot swappable battery ▼

◄ *Base charger*
Features and Benefits

- **Cycle-Life:** Replace batteries in YEARS not months
- **Uninterrupted Operation:** Simultaneously powered technology while the batteries charge
- **Fast charging:** Within 2 hours while the technology is in use
- **Lighter:** Significant weight reduction
- **Runtime:** Entire shift or longer
- **Easy access:** Changes and upgrades are easy to complete
- Virtually Maintenance Free

Battery Specifications

- **Size:** 3.75" x 5.25" x 4"
  (9.53 cm x 13.34 cm x 10.16 cm)
- **Weight:** 3.4 lbs (1.5 kg)
- 14.4 V 160 Wh Li-Ion battery
- Military grade cell technology
- Integral digital features
- REAL-TIME display
- Meets regulatory requirements including CE

How it works:
Two of the batteries are mounted to the cart while two others are being charged. Once the two on the cart are depleted, the user swaps them out for fresh ones.

Runtime:
The cart would have about 360 Wh of available power. Once you calculate your wattage draw, divide the number by available power to get your runtime.

Charging:
Typical charge time is 3.5 hours to 85% and 4 hours to 100%.

LiFe (Lithium Iron Battery)

Features and Benefits

- UL 60601-1 compliant for safe use in all patient and non-patient areas
- Power alert software protects data and low-battery alarm can be muted
- IT Fleet management software for monitoring, programming, and management of PC 910s throughout a facility
- LED monitoring of battery status
- Advanced 3-stage charger accelerates recharging and increases safety
- Internal Automatic Transfer Switch allows power supply to run connected equipment while battery module is recharging

29

Sealed Lead Acid Battery

We offer a **Power Supply Unit** with three main components:

Power Supply/Recharger (remains the same for any size battery) recharges the battery that it is connected to. The cart has three AC power outlets to which the user can plug in their monitor and CPU.

LED-Battery-Status Display shows amount of power in battery, alerting user to recharge battery by connecting to Power Supply/Recharger. The unit is generally attached to the monitor arm or in a visible location of the cart.

Battery available in three sizes, each determines run time (~4.3 hours, ~6.5 hours, and ~10 hours).

For high-traffic areas where the width and height of the base are crucial, especially between patient beds or medical equipment, AFC offers the **PC Cart™ 900**.

Available with an optional scanner holder, the **PC Cart™ 900** can easily adapt to all work situations. It's sleek, yet durable, quad-point base has a footprint of 18"W x 18"D and an overall height of less than 6". The cart's all-metal body enables disinfection and clean-room use. Special 3-inch wheels are used on the quad-point base.

E. PC Cart™ 900

- Monitor Arms # AFC16
- Utility drawer with divider and keyless electronic lock
- Retractable keyboard tray with slide-out mouse tray
- Two handles
- Scanner holder # S01

The low profile of the PC Cart™ 500 gets you closer to the patient's bedside

Features and Benefits

- Designed to hold desktop computers, and small instruments; ideal for use in any space-limited locations
- Built exclusively from cold-rolled steel with epoxy-powder-coated finish
- Pneumatic or electric height adjustment
- Flat-panel monitor mount VESA (100/75)
- Retractable keyboard tray and mouse tray
- Standard color: Textured Gray
- Multiple colors available (see page 95)
- Four rubber or plastic casters (the front two are locking)
- Additional accessories available (see page 84)

Specifications

- Rectangular base size: 20 ½"W x 24"D
- Work surface size: 20"W x 20"D
- Keyboard tray size: 19"W x 8 ½"D
- Height of work surface from the floor: ~30" to 42"

Optional

- Power supply unit with LED monitoring of battery status (see page 27)
- CPU/UPS holder
- Wire manager # WMF200 (to manage cables going from the power supply unit to the LED display)

Optional Monitor Arms

Twin Monitor Arm # 2MH

Telescopic Cart™

The **Telescopic Cart™** is designed to accommodate tight spaces; the work surface is electronically height-adjustable to enhance comfort and ease of use, whether the operator is seated or standing. Mobile on stable locking casters, the strong, durable **Telescopic Cart™** can be stationed wherever needed and makes adding an extra workstation easy and affordable. Available in different width and depth combinations, the cart can accommodate up to two flat panel or CRT monitors.

All sizes are customizable with grommet-mount or clamp-style monitor arms, multiple laminate finishes and colors, keyboard arms and trays, and larger casters for two additional inches of height.
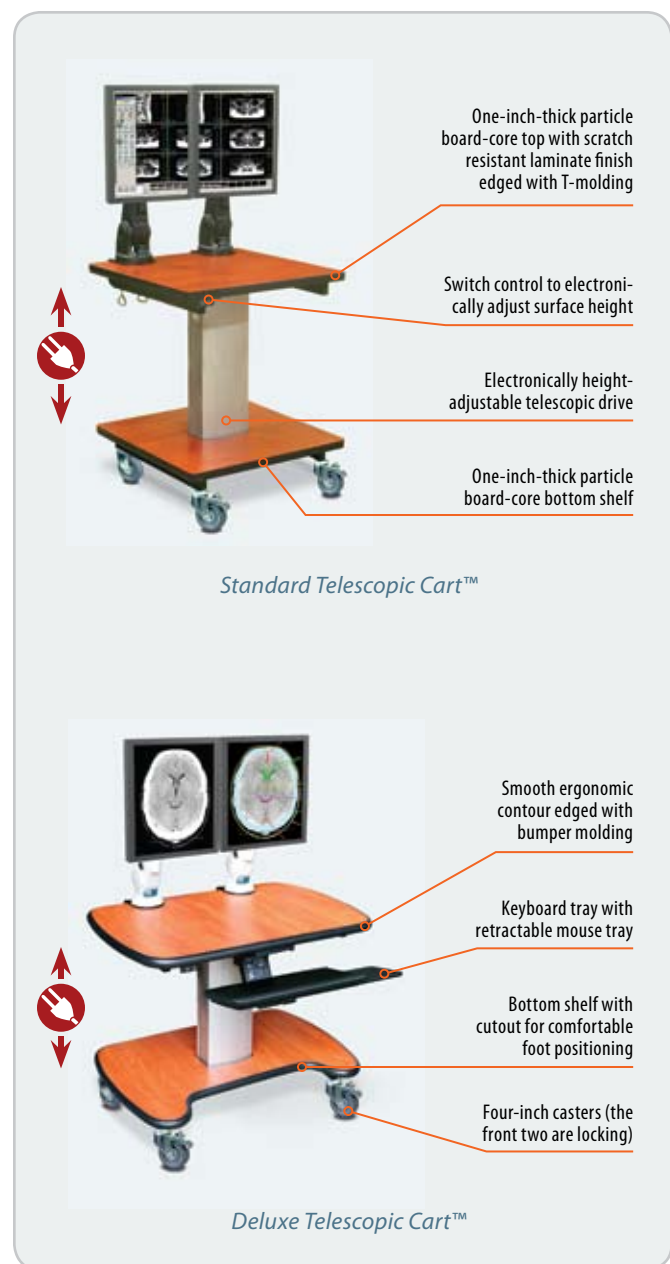

Features and Benefits

- Cold-rolled 11-gauge steel frame with epoxy-powder-coated finish
- Particle-board-core top with your choice of high-pressure laminate finish
- Chemical-resistant phenolic top and bottom surfaces available
- Work surface is electronically height-adjustable with optional electronic tilt
- Multiple colors available
  (for standard colors, see page 95)
- Four four-inch casters (the front two are locking)

Plasma Cart™

As technology has become an integral part of the workflow, the need for easy, convenient data access has grown. The **Plasma Cart™** is a durable, sturdy, and adjustable mobile solution for data and video access. Applications include teaching and training, meetings and presentations, teleconferences, telemedicine, signage and more, spanning sectors including government, military and other mission critical, commerce, healthcare, education and beyond.

The **Plasma Cart™** allows you to strategically bring a large flat screen and related electronic equipment wherever they are needed. It accommodates large flat screens with allowing tilt from -5° to +15°. All components of the **Plasma Cart™** are height adjustable. Internal wire management is enclosed by easy-to-remove access panels.

The **Plasma Cart™** can be configured according to the user's specific needs and enhanced with multiple options, such as double-monitor holder, retractable keyboard and laptop tray, additional shelves, CPU holder, camera holder for teleconferencing, telemedicine, and filming applications.

Plasma Cart™ XLCD200-01

Features and Benefits

- Fits multiple size flat screens
- Monitor mount tilts from -5° to +15°
- Mobile and stable
- All components are individually height adjustable
- Built-in cable management with removable access panel
- Standard colors — Textured Gray and Black
- Multiple colors available (for standard colors, see page 95)
- Four-inch casters (the front two are locking)

Specifications

- Utility shelf: 18"W x 16"D
- Footprint: 30"W x 30"D
- Overall height from the floor: 62"

Optional

- Multiple monitor holder (picture on the bottom right)
- Retractable keyboard/ laptop tray
- Additional shelves
- CPU holder
- Camera holder
- Surge suppressor
- Glides and additional accessories (see page 84)

The Plasma Cart™ provides a mobile display wherever it is needed, perfect for both public spaces and meeting rooms.

C. Pole Cart™ MPC200

- Black epoxy-powder-coated finish pole with built-in cutout for wire management
- Pole-mount Twin Monitor Arm # AFCPOLE2MH-1
- Handle
- Utility shelf
- Keyboard Tray # TR2000 with retractable Mouse Tray
- Data/electrical storage enclosure # WM202
- Retractable Power Cord # RPC-101
- Two pole-mount CPU Holders # CPU-101
- Additional base weight for increased stability
- Five 4" casters

F. Pole Cart™ MPC200 with square metal base

- Black epoxy-powder-coated finish pole
- Pole-mount Z-arm # AFCZ500-02
- Keyboard Tray # TR2000 with retractable Mouse Tray
- Adjustable pole-mount CPU Holder # CPU13-25
- Square metal base
- Four 4" casters

As telemedicine rapidly develops where medical information is transferred for the purpose of consulting, and sometimes remote medical procedures or examinations, AFC Industries offers the **Pole Cart™** equipped with a camera holder.

Useful for bedside patient interaction from your home or office, or when health professionals discussing a case over the telephone, or as complex as using satellite technology and videoconferencing equipment to conduct a real-time consultation between medical specialists in two different countries.

G. Pole Cart™ MPC200

- Gray epoxy-powder-coated finish pole with built-in cutout for wire management
- Height-adjustable camera holder
- Handle
- 18"Wx16"D shelf with drawer
- Speaker shelf
- Wire basket # WB-100
- Pole-mount CPU Holder # CPU-101
- Additional base weight for increased stability
- Five 4" casters
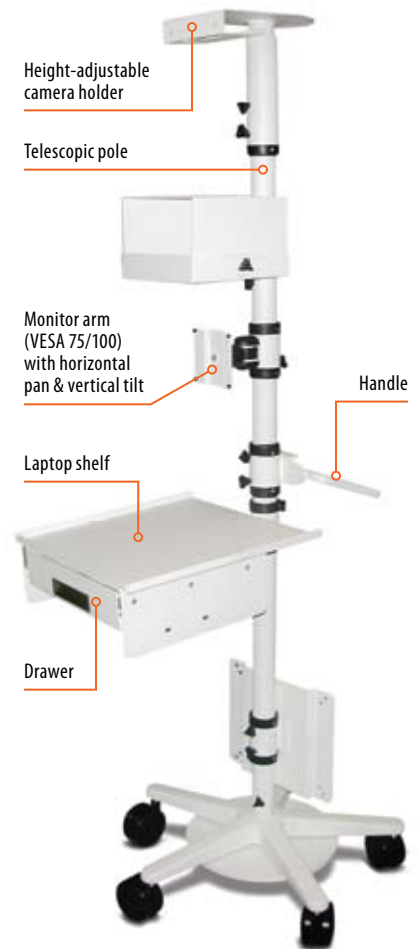

Height-adjustable camera holder

Carts & Racking Systems enhance and organize your workspace

AFC understands the need to implement ergonomics in all work environments, which is why our carts and racking systems are designed and manufactured to fit the end users. On-staff engineers can customize carts and racking systems to meet your specific requirements. "Studies have shown that ergonomic improvements result in productivity increases, dramatic increases in worker satisfaction, and a significant decrease in workplace injuries." (*www.HealthyComputing.com*)

SmartRack™

The **SmartRack™** is a modular space-saving solution that accommodates a variety of technical equipment. Highly versatile, it comes in multiple configurations for mounting LCDs, CRTs, CPUs, and all standard 19-inch rack-mount equipment.

Features and Benefits

- Cold-rolled 11-gauge steel frame with epoxy-powder-coated finish

- Particle-board-core top with your choice of high-pressure laminate finish

- Customized Ergonomic and Standard work surfaces available edged with T-molding/bumper molding

- Work surface and shelves are height-adjustable in one-inch increments

- Customized metal or wood shelves, fully adjustable and tiltable

- Multiple colors available (for standard colors, see page 95)

- Built-in wire-management conduits

- Two-inch casters (the front are locking)

- Glides and additional accessories available (see page 84)

Specifications

- Width of frame: 24", 30", 36"

- Depth: 24", 30", 36"

- Height of frame: 36", 48", 60", 73", 83"

Flipper cabinet

Wooden shelf
24", 30", 36" wide
16", 18" deep

Metal shelf
22", 28", 34" wide
16", 20" deep

Metal tilt shelf
22", 28", 34" wide
16", 20" deep

19" Rack-mount brackets
3½" high, 4" or 16" deep

Medical Equipment Cart

A FC Industries is a leading supplier of mobile equipment carts in the medical technology field. Engineered to function in small spaces and move easily, the **medical equipment cart** has been designed for, and has been tested in a variety of practical applications.

The cart is constructed using heavy duty cold-rolled steel with a powder-coated finish. An anti-microbial finish, a very important feature in the healthcare arena, is also available. Twin swivel casters provide for maximum ease of mobility and maneuverability.

The **medical equipment cart** follows a modular structure which allows for many different configurations and can be upgraded as required by the user based on their application. There is an extensive range of accessories, such as drawers, monitor arms, and CPU holders, that can be added on to the unit. OEM services available.

- Standard work surface shape
- Grommet-mount Z-arm for two monitors # AFCZ500-02
- Handle
- Retractable Mouse Tray
- Two metal drawers
- Two middle shelves
- 4" twin casters

Mounting solutions make the most of limited-space and decentralize data access

High traffic areas. Tight places. Operating rooms and emergency rooms. Inside and outside patient rooms. These are just some of the areas that are perfectly suited for AFC's variety of mounting solutions. Height-adjustable versions for seated or standing positions. Adaptable to any user. Making empty wall space productive.

Available in reach wood laminates, creating a warm and welcoming environment, as well as technical models traditionally associated with healthcare institutions. Decentralizing the availability of data for a greater return on investment in plant and human capital.

i-Center™

New!

The innovative, space-saving **i-Center™** is an attractive wall-mounted workstation that enables computer access wherever needed, without utilizing floor space. The **i-Center™** includes a fold-down keyboard tray with a damper for smooth operation and a VESA-compliant monitor holder. It accommodates any standard computer and turns empty wall space into a handy work area.

The **i-Center™** features a laminated front and side wall that can be specified to match room décor, and mounts easily with grommet holes to allow cabling. It has a removable front panel with security screws to prevent theft. The **i-Center™** was designed to make the most of limited space in today's busy environments.

Wall Mounts

The wall mounts **AFC7808_12** & **AFC7810_12**, a height-adjustable, low-profile, user-friendly solution for access to electronic records where space is at a premium. The wall mount accommodates most operators, in sit-to-stand positions. When not in use, it folds up neatly to the wall, tucked away and unobtrusive. The flexible **AFC7808_12** and **AFC7810_12** are designed with the ergonomic intelligence, strength, dura-bility, and thorough disinfection properties like other AFC products, while offering an easy-to-operate tool for boosting productivity any high-traffic areas. They are pneumatically height-adjustable within a 12" range, and can be locked in any position you chose. Full range of swivel motion at each joint comfortably accommodates different positions and applications, such as sharing information with patients and other professionals in proximity.

Wall Mount # AFC7808_12 with CPU holder # CPU101

Safety stopper at each end of track

Pneumatically height-adjustable arm with lock for varying loads

Vertical mounting

Horizontal mounting

Desktop mounting

Features and Benefits

- Light-weight aluminum construction for easy operation
- Entire mount is powdered coated in anti-microbial paint for thorough disinfection for safe use throughout medical facilities (available only in gray)
- 41" of horizontal extension from the wall with option of supplemental one foot extension arm
- 12" range of height adjustment for accommodation of most users while standing or seated
- Height locking mechanism at any position for safety, stability, and varying loads
- Full range of swivel motion at each joint
- Keyboard folds for low profile and has a safety lock
- Mouse tray a can be attached to the left or right side of the keyboard
- Mouse holder is included
- VESA 75/100 compliant monitor bracket with horizontal and vertical tilt and 3" range of height adjustment
- Standard color: Textured Gray (call for custom colors)
- Integrated wire management
- Arm vertically adjusts on 24" or 36" wall track (wall track is optional)
- Can be mounted directly on a wall or desk

Keyboard storage

Safety lock prevents accidental opening of the keyboard tray

Video Wall

The **Video Wall** consists of one or more tracks for sliding the monitor arms from left to right, where every single arm allows tilting up-down and left-right, as well as micro-adjustment to eliminate gaps between monitors. Z-arms give each monitor an ample range of motion, allowing you to position them in several different viewing arrangements.

AFC also offers the **Monitor-Wall Stand** that is designed and manufactured to support your specific monitor configuration and fit in you unique space.

The stand design is flexible, modular, and can be configured as an in-line, concave, or convex mounting solution.

Three-row Video Wall for 15 monitors

8 in.
6 in.
4 in.
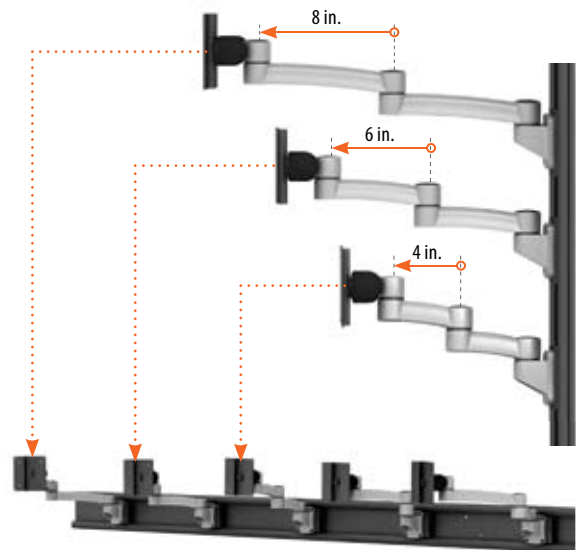

Features and Benefits

- Aluminum track with mounting holes and safety stopper at both ends allows monitor holders to slide

- Horizontal or vertical mounting of tracks

- Z-arm monitor holders with extension, tilt, and pan motion; arms have varying length to provide parabolic shape for optimum viewing

- VESA-compliant monitor holder that can be adjusted from portrait to landscape views and tilted to avoid glare

- Combination setup allows horizontal and vertical adjustment of the monitors

- Monitor travels from 4" to 20" from the wall

- Multiple colors available (for standard colors, see page 95)

Optional

- Monitor holders # AFC16, # AFC18, # AFC22 (tilt and pan only)

- Non VESA-compliant monitor holders available for larger flat screens
The outer monitor arms are longer than at the center, which lets you create a comfortable viewing arc. When laid out straight, the monitors can get as close as 4" to the wall.

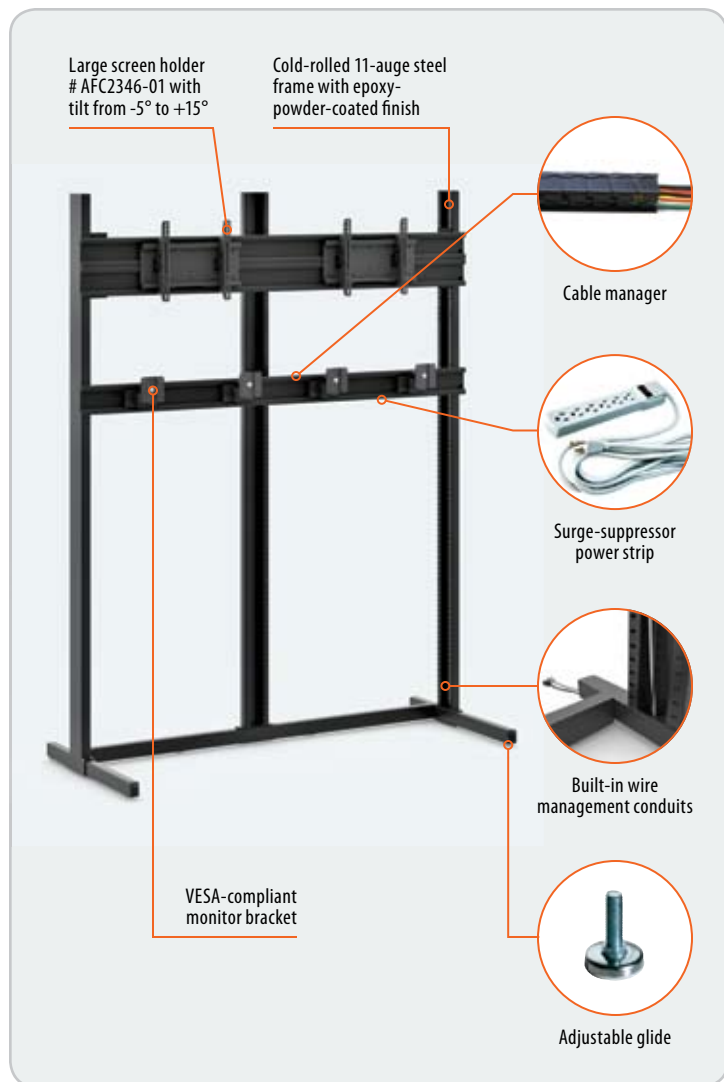

The Video Wall's freedom of motion allows you to combine monitors of different shapes and sizes, in any arrangement, without gaps.

The primary frame is built from steel with powder-coated finish for durability and can support any size flat screens.

The Monitor-Wall Stand features a horizontal track with an array of monitor mounts that allow the user to align and position the monitor in the most optimum viewing position. Built-in wire management conduits allow the routing of cables from the screen all the way to the floor/ceiling in a discreet manner keeping in mind the aesthetics of the room it is in.

The unit features a variety of accessories like power strips, CPU holders, adapter holders that can be added to the Monitor-Wall Stand to create a complete stand alone monitor wall. Rather than have an empty space below the screens, we can provide you with a panel (fabric, metal, or laminate) to match your décor which can also double up as a bulletin board, modesty panel (to hide some electronics and cables), or just to make it more appealing.

Large screen holder # AFC2346-01 with tilt from -5° to +15°

Floor Post

The Floor Post Series™ creates a more effective, comfortable, and productive work environment. Based on your specifications, you can have unlimited configurations for any task. Its space saving design also allows multi-side (front/back/side) user capability. The **Floor Post Series™** can be mounted to various floor surfaces. Monitor, keyboard arms, CPU holders, shelves and other accessories can be made height adjustable on a secure track making the **Floor Post Series™** suitable for multi-users.

Floor Post # FP04

Floor Post # FP06

Based on your specifications, you can create unlimited configurations suitable for any task

Features and Benefits

- All components are individually adjustable
- Spring-loaded locking mechanism for simple and easy height adjustment (depending on item)
- Built-in wire management
- Monitor holders of your choice: AFC10E/F/G, AFC16, AFC18, AFC22, AFCZ5-00, AFC7808M_01 (see page 89)
- CPU holders of your choice: CPU-101, CPU13-25, CPU-08, or CPU-09 (see page 91)
- Multiple colors available (for standard colors, see page 95)
- Additional accessories available (see page 84)

Specifications

- Base footprint: 16"W x 16"D
- Overall height from the floor: 60"

Optional

- Double-monitor holder
- Foldable and retractable keyboard arm with slide-out mouse tray
- Additional shelves
- Camera holder

Adjustable Detector/Cassette Stands for flexibility and accuracy with minimal effort

New at AFC are products designed for image stitching applications in the assessment of Scoliosis, Long Leg, and other disorders. Whether diagnosing in a computed radiography or digital radiography environment, our new flexible scoliosis products offer ergonomic and flexible solutions that adapt to your needs.
# Spine Smart™ Digital Radiography Detector Holder

FOR SCOLIOSIS AND IMAGE STITCHING APPLICATIONS

The **Spine Smart™** height-adjustable mobile detector stand is used in applications with a digital radiography (DR) detector, and can be modified to specifications. It increases accuracy and decreases time per procedure, based on AFC engineering and design. Color-coded adjustable markers ensure optimal positioning of the detector. A clear acrylic panel and securing straps maximize patient positioning during the procedure.

Features and Benefits

- Constructed using high-grade steel and aluminum allowing the unit to be cleaned and disinfected using standard medical cleaning agents
- Electronic height adjustment accommodates patients of various sizes
- Independent detector and grid holders allows for insertion and removal of detector without removing the grid
- Detector and grid can be rotated 90º in either portrait or landscape
- Color-coded adjustable markers allow easy detector positioning for image stitching
- Straps and a clear acrylic panel improve the accuracy of patient positioning
- Handle and small footprint with large 4" wheels provide for easy movement from room to room with detector and grid in place
- Two front locking casters secure placement of the stand
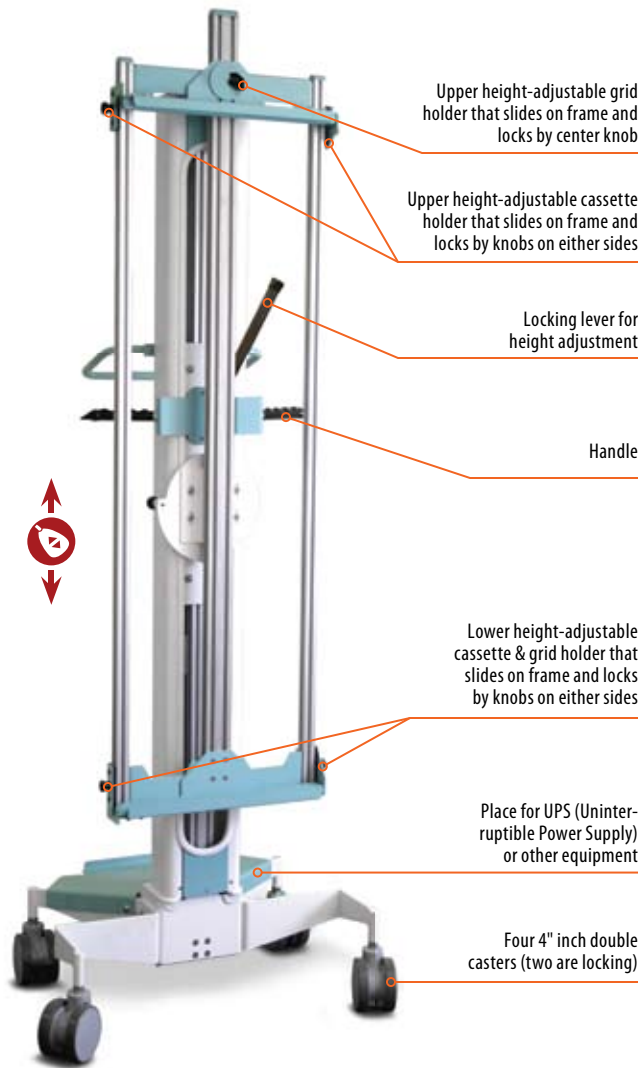

Specifications

- Footprint: 30"W x 22"D
- Detector and grid can move from 6" to 31" above the floor accommodating patients of various sizes

Optional

- Color-coded adjustable markers on either left or right side

Handle

Lower height-adjustable cassette & grid holder that slides on frame and locks by knobs on either sides

Place for UPS (Uninterruptible Power Supply) or other equipment

Four 4" inch double casters (two are locking)

MACH-ONE™ with pneumatic height adjustment

The **MACH-ONE™** is a height-adjustable mobile X-ray cassette stand used in computed radiography (CR) applications. It is available with either electronic or pneumatic height adjustment and accommodates cassettes of many different sizes and shapes.

The **MACH-ONE™** is also available as a wall-mounted product.

Features and Benefits

- Constructed using high-grade steel and aluminum, for cleaning and disinfection with standard medical cleaning agents
- Pneumatic or electric height adjustment
- Adjustable cassette holder accommodates all standard cassette sizes such as 8"x10", 10"x12", 14"x17", 14"x34", 14"x50" and more
- Independent cassette and grid holders
- Cassette and grid can be rotated 90º in either portrait or landscape
- Handle and small footprint with large 4" wheels provide for easy movement from room to room with cassettes and grid in place
- Two front locking casters secure placement of the stand
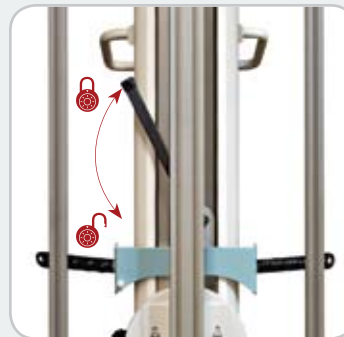

Specifications

- Cassette and grid can move from 6" to 31" above the floor, accommodating patients of various sizes

79

The wall-mounted **MACH-ONE™** is a good example of AFC's flexibility to adapt its products to meet customer needs. It was designed on request of a facility with over-riding space constraints.

The wall-mounted **MACH-ONE™** provides additional benefits, such as protection against equipment theft and easy location of this valuable diagnostic tool on demand.

Wall-mounted MACH-ONE™

Secure your healthcare facility with AFC's flexible Control Consoles

We live in a world of rising security needs. Medical facilities are not immune. Whether protecting lives, sensitive patient information, or property, security has become an essential operational concern.

Our line of adjustable security consoles and video walls enable many areas of a facility to be simultaneously monitored by a single or multiple operators and can be easily relocated as needed.

We produce a wide array of mounting solutions that meet the extensive needs for video and CCTV surveillance of outer and inner areas, whether on single or multiple monitors. AFC's modular racking systems facilitate efficient storage of valuable electronic and audio-visual equipment.

Control Pod Consoles

Large medical centers. Hospitals. Imaging centers… critical facilities to secure and so many areas to monitor — multiple entrances and exits; operating rooms and other restricted zones; patients, employees, and visitors; sensitive patient and institutional information, valuable equipment, and more.

Our **Control Pod Consoles** are perfect for applications that require viewing multiple monitors simultaneously. Cover all critical areas of your facility at one integrated console or at several consoles, using monitors of different sizes and configurations, according to your needs.

Control Pod Consoles are offered with optional electronic height adjustment of the work surface for multiple users in a 24 x 7 environment, and for sit-to-stand working positions that help maintain alertness and concentration. Independent electronic monitor adjustment is also available for both monitor height and focal length to ease eye strain and optimize performance of security personnel. Horizontal adjustment of monitors along tracks and vertical micro-adjustment eliminates gaps between monitors. Extensions on the outer monitor arms allow for a more comfortable viewing arc.

Features and Benefits

- Monitor platform accommodates monitors of different shapes and sizes, in any arrangement, without gaps
- First and last columns of monitor arms have longer reach to provide optimal parabolic viewing shape
- Built-in extra-quiet fans for CPU ventilation
- Cold-rolled 11-gauge steel frame with epoxy-powder-coated finish
- Particle-board-core top with your choice of high-pressure laminate finish, edged with bumper molding or T-molding
- Multiple colors available (see page 95)
- Glides or 4" casters

Optional

- Electronic height adjustment of work surface and monitor platform
- Retractable work surface to adjust the distance from the monitors
- Lockable 3-drawer pedestals
- Mesh doors for front and rear CPU access
- Footrest

AFC's Control Pod Console allows you to mount a large number of screens of different sizes without sacrificing ergonomics

Monitor platform with height-adjustable monitor rail system for different size monitors

81

Designed with ergonomic intelligence for a wide range of users and needs, AFC's consoles help professionals work more comfortably and effectively.

The **B-Line Consoles™** are designed to allow you to line them side by side in front of a central set of screens. The consoles have ventilated cabinet enclosures and available in two configurations: one is for recessed monitors, another — with a rack mount option to house your equipment. We can customize the consoles to perfectly fit your space, equipment, and other specifications.

B-LineConsole™ for recessed LCD monitors and cabinet enclosures for front CPU access

Z-series monitor arm provides an adjustable viewing depth for LCD monitor

Storage with mesh doors for ventilation

The **B-Line console™** shown on the right features two 3U rack mounts that facilitate efficient storage of valuable electronic and audio-visual equipment. Our grommet-mount Z-arm allows you to position your monitors at any viewing level, angle, and depth. Removable back panels with mesh ease access for wire management and servicing.

Z-series monitor arm for two LCD monitors

3U rack mount

Storage space for computer equipment

Grommet-mount Z-arm for two monitors

Removable back panels with mesh for ventilation

Open Control Consoles

Open Control Consoles come in two configurations: the monitor height can either be adjusted independently of the work surface (images A), or can move together with the surface (image B).

The consoles come in multiple surface shapes (see page 12) and colors, and feature an optional retractable work surface for adjusting the distance to the monitors.

A. Open Control Console 84"W x 51"D:

- Independent electronic height adjustment of work surface and monitor platform
- Monitor platform on telescopic drives for 12 LCD monitors
- Retractable work surface
- Back bottom shelf
- 4" casters

B. Open Control Console 60"W x 36"D:

- Electronic height adjustment of work surface
- Manually height-adjustable monitor rail system for different size monitors[1]
- Bottom shelf
- 4" casters

1 Monitor holder bracket might vary based on size/weight/model

Our non-electric **Open Control Consoles** has fixed work surface height and manually height-adjustable rail system with two big monitor holders (image C).

Monitor holder # AFC4271-01

C. Open Control Console with a fixed height:

- Manually height-adjustable monitor rail system with two monitor holders # AFC4271-01
- Two split bottom shelves
- Two wire managers # WMF100
- 4" casters

83

ACCESSORIES

Accessories help to optimize ergonomics in your workspace

AFC Industries has an entire division devoted exclusively to designing accessories for every conceivable requirement, from ergonomically correct and functionally optimal monitor mounts to keyboard trays with retractable features and attachments for holding a telephone and/or dictation equipment, and even a beverage cup; from ambient and task lighting solutions for different needs and applications to cable management and much more.

Visit *www.afcindustries.com/accessories* to learn about our wide array of accessories for a multitude of needs.

Partitions

Complete your work area using AFC **Partitions**. These partitions absorb sound and provide privacy. They also prevent interference from monitors or other light sources. They can be manufactured with a tinted or clear Plexiglas panel across the top so operators can see outside of their "cubicle."

AFC offers both free-standing partitions and partitions affixed to the floor or cart. Our partitions can be configured to suit your application.

Features and Benefits

- One-inch sound-absorbing fiber with reflector on one side
- Cold-rolled 11-gauge steel frame with epoxy-powder-coated finish
- Prevents light interference
- Can be used as a tack board
- Multiple colors available (for frame colors, see page 95)
- ¼" thick free-standing base

Specifications

- Width: 36", 48", 60", 72"
- Height from the floor: 60", 72"

Optional

- ⅛" tinted or clear Plexiglas top
- Fiber top with removable lower metal panel and built-in continuous cable management
- Free-standing, mobile (2" twin casters), or affixed to the floor/cart

Fabric Standard Colors

| Black | Gray | Blue |

A. Partition 60"W x 60"H

B. Partition 60"W x 72"H with tinted Plexiglas top

85

C. Partition 72"W x 72"H

D. Partition 72"W x 72"H with tinted Plexiglas top

E. Metal Partition affixed to the workstation

F. Partitions affixed to the floor

G. Partitions affixed to the floor:
- Light and sound barrier fiber top
- Removable lower metal panel allows back CPU access
- Built-in continuous cable management

H. MobiCube™ 64"W x 48"D x 60"H

MobiCube™ panels can roll anywhere or be mounted on AFC's workstations to instantly create a reading-room environment. These partitions use special hinges that allow you to position them at any angle from 0-90º. They can lock into place using the two lockable casters.

The **MobiCube™** can either create a cubicle or act as a partition along the length of the room itself, without going through the complexities of installation or building codes, as all our products come fully assembled.
MobiCube™ Configurations

LCD Monitor Arms/Holders

AFC Industries Inc. provides a variety of solutions for mounting LCD monitors. We offer five categories: **Desktop series, Z-series, Wall Mount series,** and **Ceiling Mount series**.

Our Desktop series includes three types of VESA-compliant LCD monitor arms: grommet-mounted, base-mounted and clamp-mounted.

Combining style with functionality, the Z-series with articulating monitor arms allows you to position your monitor at any viewing level, angle, and depth from the viewer, providing maximum flexibility. The Z-series comes with a clamp that can also be wall-mounted.

Base-mounted electronically height-adjustable LCD monitor & Keyboard Arm # ERGODT-01

Want to go from sit to stand at the touch of a button? Not a problem!

Install our ERGODT-01 on your existing table/work surface and within minutes you have a complete electronically height-adjustable work space!

Features

- Electronic height adjustment of 19"
- Fully articulating and retractable keyboard arm provides maximum freedom of motion
- VESA 75/100 compliant monitor mount with up/down tilt, right/left swivel and also rotation from portrait to landscape
- Independent vertical adjustable mounts for both the monitor and keyboard to set the desired spacing between the keyboard and monitor at 2-inch increments
- Rear shelf provides space to place CPU if required or just storage space for any of your other equipment

AFC also offers a variety of **electronically-adjustable monitor platforms** that allow you to change the height of the monitors and move them forward and backward at the touch of a button, for superior viewing results. These platforms accommodate up to six LCD monitors (depending on cart size and monitor weight) and can be mounted on all AFC workstations (see the sidebar on page 13 for details).

Ceiling Mount Series

The **Ceiling Mount** is a simple but sturdy LCD monitor arm that allows users to adjust the monitor at their required height and viewing angle. It also allows rotation and tilt positioning of the monitor. Cables can be wired through the tubing for connection to the monitor.

Ceiling Mounts come with a standard VESA 75/100 plate. Non VESA-compliant monitor holders are also available for large-scale LCD monitors.

From concept to installation

FREE on-site consultation

At AFC we want to get it right the first time, every time, to create a great custom environment for our Customers. That's why we will come to you to ensure we are maximizing your space and that everything is measured up just right. We will work with your team, at no charge to you, from the beginning to the end of your project.

Customization

AFC can easily customize all products to adapt to your professional and individual requirements. Whether you need help choosing the right components to configure a product or are considering a complete room redesign, our staff is committed to offering you assistance every step of the way.

FREE project support

Our team is here to assist you with your vision. We have the experience to help with your project and pride ourselves in going above and beyond to not just meet, but exceed your expectations.

Outstanding customer support

Our experienced sales and engineering teams are here to walk you through the process from the smallest to largest jobs. Building rapport with our customers is a driving force throughout the relationship and is maintained during the entire project including follow-up.

FREE design service

We want to use our many years of experience creating spaces to take full advantage and help you go beyond your imagination. With some of the most mechanically advanced products, we will help you achieve your goals, all at no additional cost to you.
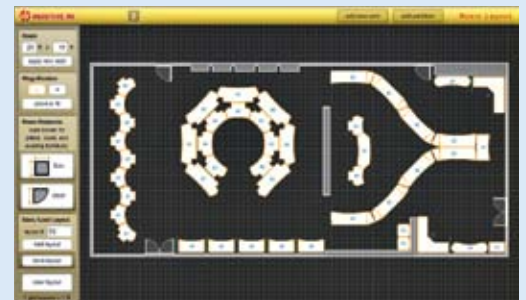

*Use our **Room Layout Designer** to see how you can create an ergonomic environment with AFC's products*

Anti-microbial paint

AFC now offers the added protection of anti-microbial powder-coat finishes on its products to provide protection against a broad spectrum of micro-organisms. When applied to mobile carts, wall mounts, and work stations the risk of spreading harmful bacteria and viruses between patients and health care workers is greatly reduced, according to doctors using the anti-microbial powder coating in their hospitals and laboratories.

High-density polyethylene (HDPE) top now available with antimicrobial protection

A new kind of antimicrobial protection upgrade now available in many of AFC's polymer sheets, slabs and massive shapes. HDPE helps products stay cleaner between cleanings and inhibits the growth of product-damaging microorganisms, including bacteria, algae and fungi on the surface. Microbe cell walls that come into contact with HDPE are destroyed on contact, without creating opportunities for adaptive or resistant strains to form. Because the antimicrobial agent is bonded at the atomic level throughout the sheet, it will not leach out of the product. This means the agent retains its effectiveness throughout the life of the product and does not harm the environment.

It is safe, non-toxic and non-hazardous to ship and handle. The product is EPA-registered and listed with the FDA as a modifier to medical devices.
Products made using AFC's polymers with HDPE are easy to clean, disinfect and keep hygienic using standard cleaning procedures. Constant use of cleaning solutions will not affect any polymer.
